

Employment Opportunities

January 2009 - Currently, IERS is not hiring for any positions.

However, we accept resumes year-round for our summer seasonal positions in ecological restoration, research, and inspections. If you would like to submit a resume, please send it via email to Debbie at dhogan@ierstahoe.com or bring it by our Tahoe City office located at 2780 Lake Forest Road. Please indicate your department/position preference(s).

We will update this posting as our employment needs change.

IERS is an equal-opportunity employer. We do not discriminate in our hiring practices with regard to race, color, religion, creed, national origin, sex, ancestry, age, sexual orientation, marital status, disability or any other characteristic protected under state, local, and federal legislation.

Integrated Environmental Restoration Services (IERS) is a Lake Tahoe-based consulting and contracting firm dedicated to developing, implementing, and advancing science-based restoration practices throughout the Sierra Nevada.

IERS is committed to discovering common *ground* and creating uncommon *solutions* for complex environmental management and restoration projects.

We offer career opportunities in the following:

Restoration Contracting

The restoration team uses progressive, soil-based native plant revegetation and erosion control practices that create functional and sustainable restoration sites.

Ecological Assessment, Monitoring, and Research

Monitoring and research provide vital information that allows us to better understand ecosystem function and constantly improve our restoration treatments and specifications.

Construction Oversight

Inspectors work proactively with contractors to ensure that specifications and regulatory requirements are understood and followed to ensure that the construction process goes smoothly and results in maximum environmental protection.

Training/Education

We provide a range of training to clients including restoration classes, residential and commercial contractor and inspector training, and BMP design and implementation training.

Project Planning and Design

We develop plans and specifications for a broad spectrum of projects, including revegetation and erosion control specifications, watershed restoration plans, mitigation plans and Storm Water Pollution Prevention Plans (SWPPPs).

Required Skills

- Prefer a college degree in Environmental or Earth Sciences
- A “can-do” attitude and self-motivation
- Good people skills and attention to details
- Ability to work in the outdoors in mountainous terrain and conditions
- Dedication to quality work

If you are interested in joining our team, please forward a resume to Debbie at:
