

Stormwater Pollution Prevention Planning and Oversight

IERS works closely with project designers and implementers to understand and comply with regulatory requirements during construction. IERS creates highly usable Storm Water Pollution Prevention Plans (SWPPPs) in plain language with practical instructions for construction contractors. IERS also develops and implements highly successful SWPPP training programs. From small-scale restoration projects to large-scale development, our inspectors work proactively with contractors so that specifications and regulatory requirements are well understood and upheld to ensure that the construction process goes smoothly.

Specific Services

- Stormwater Pollution Prevention Plans (SWPPPs)
- SWPPP Contractor Trainings
- BMP Design and Implementation
- BMP Effectiveness Monitoring
- Restoration Project Implementation Oversight
- Erosion Control
- Regulatory Compliance
- Agency Facilitation

Selected Projects

- Northstar Environmental Management and Construction Oversight
- Sierra College Restoration Oversight and SWPPP Preparation
- Tahoe Regional Planning Agency Best Management Practices Manual Update
